DEFINATION

- "Intangible Assets" "is an identifiable non monetary asset, without physical substance, head for using the production of supply of goods or services, for rental others, or for administrative purpose

INTANGIBLE ASSETS

221246

APPROACHES ON VALUATION OF INTANGIBLE ASSETS:

The market approach

- It uses

1. Market based indicators of value
- For intangible asset this can be transactions involving
 1. Selling
 2. Buying
 3. Licenceing intangible assets
- Which often in practice are bundle with other deals

The income approach

The market approach

The cost approach

Cost approach

- It uses two basic consideration

1. The historical cost of creating the intangible asset
 2. The estimated cost and time that would be required to create replacement of intangible asset
- This approach is best on economic principle of substitution and usually ignore the amount timing and duration of future economic benefits as well as it is tough performance within a competitive environment

Income approach

- It uses

1. Future estimated economic benefits
2. Cash flows
3. Discounts them for the associated time and risks involved to present value
