Stress seems to worsen or increase the risk of conditions like obesity, heart disease, Alzheimer's disease, diabetes, depression, gastrointestinal problems, and asthma. Experiencing anxiety or depression can make it difficult to eat well, but good nutrition is necessary for your mental wellbeing. A healthy lifestyle can be beneficial for one's mental health. Thus, identifying healthy lifestyle choices that promote psychological well-being and reduce mental problems is useful to prevent mental disorders. Exercise can also improve your general health. One can benefit most from regularly exercising for 30 minutes or more, but it's okay to build up to it gradually. The awareness programme was to educate the mass about the ways to combat the mental stress along with the physical weaknesses and move ahead in life with a much enthusiastic spirit and energy.
